EDUCATION

Bachelor of Computer Application

Vidyasagar University / Contai / January, 2025 - Present

Currently pursuing Bachelor of Computer Applications (BCA) with a strong focus on software development, web technologies, database management, and artificial intelligence. Gaining practical experience through hands-on projects in full-stack development and AI-based applications

SKILLS

- Problem-solving - Skillful
- Adaptability - Experienced
- Time management - Expert

Subhadip Mondal

AI Explorer

Passionate AI Explorer and Full-Stack Developer experienced in building AI-powered web applications using React, Node.js, and Python. Developed projects including AI PDF Generator, Document Summarizer, and interactive 3D applications. Focused on creating scalable and innovative solutions with modern technologies.

ACHIEVEMENTS

Developed AI-Powered Web Applications

Successfully built and deployed multiple AI-based applications including AI PDF Generator, Document Summarizer, Global Translator, and interactive 3D projects using modern web and AI technologies.

EXPERIENCE

AI & Full-Stack Developer (Personal Projects)

Self-Employed / Independent Projects / India (Kalindi) / January, 2025 - Present

Developed AI-powered web applications including AI PDF Generator, Document Summarizer, Global Translator, and 3D Tic Tac Toe. Built full-stack applications using React, Node.js, Python, and REST APIs. Implemented real-time features using Socket.IO and deployed applications using Render and Replit.

PROJECTS

3D Tic-Tac-Toe Game

Developed a 3D multiplayer Tic-Tac-Toe web application with AI-powered single-player mode and real-time multiplayer functionality. Integrated Socket.IO for live gameplay, room-based invitations, and spectator mode with synchronized game states. Implemented authentication and room management using Supabase, with interactive 3D animations built using Three.js.

Global-Translator-AI

Developed an AI-powered multilingual translation web application using Python, LangChain, and Streamlit. Implemented real-time contextual translations leveraging large language models and prompt engineering techniques. Designed an interactive UI with dynamic language selection and scalable AI pipeline integration.

AI-Prompt-Generator

Developed an AI Prompt Generator web application using Python, LangChain, and Streamlit. Leveraged large language models to create optimized, structured prompts for content creation, code generation, and automation tasks. Designed an interactive interface with real-time, context-aware prompt generation, demonstrating practical expertise in prompt engineering and LLM orchestration.
